iDEC Project Display Guide

Wiki

iDEC Wiki is a platform for your team to **present your project to the public** and **disclose research records to our judges**.

The wiki space will be available for creating your design on 10 Aug, you should receive an email with the guide from our web team before 10 Aug.

Please design your wiki into two parts:

1) PROJECT – for presenting your project to the public

iDEC only defines wiki as a window to publicize and introduce your research to the public, and all academic awards will not be based on wiki content. Instead of showing a lot of content in the wiki or in a very professional form, interesting design for attracting public interest, allowing visitors to understand the scientific significance of your research in an easy way will be more important.

Please Imagine that the reader who browses the wiki is a person without any professional background. How can you let the reader understand your creativity, work and contribution simply and quickly?

2) DOCUMENTATION

For releasing protocols and records.

iDEC will not limit the iDEC team to display projects in different forms. For example, you can make videos, artwork, interactive web pages, and you can also make web games and so on.

Although the initial framework of the **Project** section in the wiki system includes **Background & Results** as two parts, the iDEC team can modify this framework to match any design proposed by the team.

Please keep the framework of the **Documentation** section (including Protocols & Lab notebook), and your protocols can be presented in the form of links to third-party websites.

For property considerations, iDEC also makes the following policy on the content of the wiki:

1. **The use of copyrighted materials on the wiki is prohibited.** The violating content may be deleted from the wiki and the team will lose relevant scores.
2. **We prohibit any content that violates the iDEC Equality and Diversity Policy on the wiki platform.** In addition, we will reject any content that contains discriminatory, insulting, or political connotations). Violation may result in deprivation of eligibility for awards.
3. **Please upload the pictures and texts contained in all wiki pages to the GitHub space.** If you have any technical questions, don't hesitate to contact our web team: support@idechq.org.
4. **Please upload all video files used in the wiki to the iDEC server.** If your team will use video, please contact our network team: support@idechq.org.

POSTER

Size: A0 (Vertical Version)

The poster should be in the format of an academic poster.

The poster must include the iDEC Logo, a project title, a QR code that links to the team wiki, a list of authors, the participating institute or organization, and any other necessary team information.

Download our LOGO from the attachment.

Other than the above, teams are free to determine the layouts of their posters.

PRESENTATION

Every team should prepare a presentation that will be completed within 20 mins, and then attend a Q&A session that will last no more than 10 mins.

The presentation **CAN** but does **NOT HAVE TO** include scientific engagement-related content, which depends on the team's design of the overall expression effect.

The imaginary audience for the presentation should be other participants and judges participating in the iDEC Festival.

iDEC will record the presentation.

AI Policy: The development of AI has helped non-native speakers. iDEC does not oppose the use of AI to improve presentation effectiveness. The presentation scoring in 2024 will evaluate the use of AI for the first time. We will not change the scoring items for speech effectiveness in the scoring form, but we will remind judges to consider whether AI increases or decreases the audience experience. We believe that the reasonable use of AI can improve the audience experience, and the overly rough use of AI may also create a gap between the speaker and the audience.

REPORT

iDEC Report is the **most important** criterion for iDEC to evaluate the academic value of the project. Please pay attention to the quality and readability of the report. The judges may ignore data and conclusions that did not appear in the report.

The report should contain all the information relevant for scoring towards awards.

Your report should be written in the format of an academic article, including an

Title (less than 20 words)

Authors

Abstract (less than 150 words)

Introduction (less than 500 words)

Results (less than 2000 words)

Discussion (less than 500 words)

Methods

References

Important: All references must be marked with a valid DOI info beginning with '<https://>' and the text hyperlinks must be added to the PDF file.

Author, Title. *Journal*/Volume|, pp. Pages| (, Year|). DOI

Author, Title. *Journal*/Volume|, Article Number| (, Year|). DOI

Example:

1. T. Aparicio, J. Silbert, S. Cepeda, V. de Lorenzo, Propagation of Recombinant Genes through Complex Microbiomes with Synthetic Mini-RP4 Plasmid Vectors. *BioDesign Research* **2022**, 9850305, (2022).

<https://doi.org/10.34133/2022/9823578>

Acknowledgements (contribution)

&

An independent file for supplementary information.

We encourage the teams to upload raw data and experiment records to reliable third-party data repositories so that readers can access through the manuscript.

The supplementary information should include supplementary figures, sequence information (if not deposited at sequence repositories), or any other necessary information to support the conclusion.

iDEC does not regulate the details of formats such as fonts and font sizes, but whether the report meets the recognized standards of academic

**manuscripts will affect the judges' evaluation of the report's quality.
Therefore, we strongly recommend that the team follow the styles and
requirements of mainstream publishers in preparing the manuscripts.**

SCHEDULE

The report submission channel will be open from **28 September to 1 October**, and closed at 23:59 (GBT) on 1 October. (We will remind you via email and related updates will also appear on the iDEC homepage.)

The wiki space will be available for creating your design on **10 Aug**. The freezing time of the wiki will be at 23:59 (GBT) on **8 October**.

For teams will present online, we will collect your poster and presentation slides from **22 October to 26 October**.

For teams will visit iDEC Festival on-site, you can save your file into our computer in the morning of your presentation date. **Copying PPT files may sometimes cause changes in font format and graphic ratio. Therefore, we will arrange time to allow teams to enter the venue in advance to prepare.**
